

NEW 1937 MODEL DeLuxe Highspeed MOTOR GLIDE

for

Men . . Women . . Boys . . Girls

*“Here’s the smartest, safest,
handiest and most economical
motor transportation.”*

COL. ROSCOE TURNER

Col. Roscoe Turner and his MOTOR GLIDE

MOTOR GLIDE *exactly fills a need not served by the bicycle, motor cycle or automobile.*

Give Yourself a Lift

Step on the MOTOR GLIDE just outside your door. Short trips or long jaunts it beats walking and saves the car. A cool ride on hot days. A quick ride on cool days.

A thrilling ride with sporting zest. Away you go. Be there before you could start the car and get it out of the garage. Makes going places easy and fast.

Men, women, boys and girls ride in comfort on a soft cushion seat. Nothing to straddle. No gears to shift. No clutch to operate. No hard steering. No parking problems. Comfortable hand rests on conveniently placed handlebars.

Solves the problem of the family with one car. Ride five miles a *day* with a *weekly* fuel cost of about ten cents. Think of riding 125 miles on a gallon of gasoline.

MOTOR GLIDE is ideal for parties, sporting events and social gatherings. It is the perfect vehicle for young folks of high school and college age. Its numerous practical everyday uses make it the transportation "hit" of the year.

Smartly streamlined for style and beauty. Spin along on a MOTOR GLIDE.

The New 1937 Model De Luxe MOTOR GLIDE is precision designed and tested. Built to exacting specifications under direction of nationally known automotive and aeronautical engineers. Constructed for long life, economy, and carefree maintenance. Patents issued and others pending.

Sturdy and Well Made

Specifications

MOTOR by Evinrude. Single cylinder, 2 port, bore 2", stroke 1 5/8" with internal rotary intake valve. Piston displacement 5.1 cu. in. Crank case is cast aluminum alloy of great tensile strength. Carburetor is float feed, auto type. Flood and leak proof. Single adjustment for mixture control. Bearings are ball bearing on load end of crank shaft, taking all driving strains. Bronze bearing seals crank case compression and supports inner end of crank shaft. Built-in flywheel magneto generates properly timed spark for most efficient firing. Moisture and water proof. Motor speeds up to 3500 r.p.m., equivalent to approximately 35 M.P.H. Rated 3/4 horse power.

AUTOMATIC COMPRESSION RELEASE—Opens when throttle is closed, permitting easy starting.

FUEL TANK—Capacity, 1/2 gal. One gallon sufficient for approximately 125 miles of everyday travel.

MUFFLER—Cast aluminum, oversize, with internal baffle plates. Effectively muffles objectionable noise.

COOLING SYSTEM—Efficiently air cooled by large fins on cylinder.

LUBRICATION—Oil mixed with gasoline, 1/2 pint per gallon of gasoline, lubricates entire engine. Unique design keeps portion of oil in crank case for added bearing lubrication.

FRAME—Pressed steel, beautifully streamlined. Reinforced for rigidity and strength.

WHEEL BEARINGS—Heavy size New Departure ball bearings throughout. Their quality is an assurance of carefree service.

BRAKE—Positive action. Built as a part of rear wheel assembly. Controlled by lever at left finger tips.

TIRES—General Tire & Rubber Company's General Jumbo Jr., size 12 x 3.50; standard equipment includes inner tubes with Airex puncture proofing in rear tire guaranteed by General Tire & Rubber Co.

SEAT—Extremely comfortable, coiled spring construction, amply padded with felt and hair, covered in attractive finish to harmonize with color scheme. Mounted on tubular steel frame giving added spring action.

ACCESSORIES include electric horn, headlight and tail light.

PARKING STAND—Simply operated by foot. No lifting required.

SPEED—From walking speed to 35 M.P.H. Comfortable cruising speed, 25 M.P.H.

FINISH—High gloss jade green and Chinese red with attractive cream trim and wheels standard colors. Exposed metal parts chromium plated. Special colors upon request at nominal extra cost.

WARRANTY—Salsbury Corporation gives special warranty on each MOTOR GLIDE.

PRICE—\$155 including Federal excise tax f.o.b. Chicago or Los Angeles.

Specifications and price subject to change without notice.

Easy to Operate and Ride

Anyone can ride a MOTOR GLIDE. Here are the simple operations:

First—Give the MOTOR GLIDE a push and step on. (Automatic compression release makes starting easy)

Second—Give it gas by opening the throttle with your right hand and away you go.

When you want to stop, use the brake lever at left finger tips.

Horn button under your left thumb. Headlight and tail-light switches convenient. When you park, rest stand under the platform easily dropped or lifted by your foot.

Two can ride tandem easily. Heavy-weights are carried lightly on this strongly built MOTOR GLIDE.

MOTOR GLIDE is perfectly balanced. Learn to ride in a few minutes. Under-slung weight and low center of gravity add automatic safety for operator. Even when you are sitting on the seat, both feet can be rested on the ground.
