

AUTOMOBILE DEALERS, GARAGES, SERVICE STATIONS

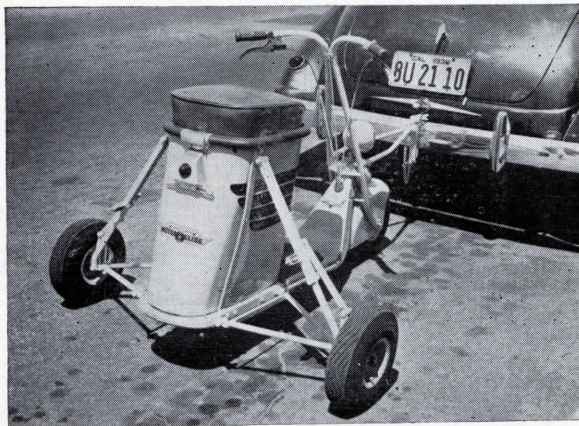

GET MORE BUSINESS by picking up and delivering cars, doing repair, lubrication, washing and other work at convenient times for both owners and service men. Pickup and delivery service creates new business and regular customers.

THIS SERVICE used to be an expensive matter, due to high cost equipment and heavy maintenance expense. NOW ALERT OPERATORS render pickup and delivery service at nominal cost, with the

Above: Cycletow with wheels raised for service.

Below: Cycletow with wheels lowered for towing.

MODEL NO. CT-60

Sold only as a complete unit with one H.P. engine, automatic clutch and self-shifting transmission.

Price \$195.00 F.O.B. Inglewood, California

SELF-SHIFTING MOTOR GLIDE CYCLETOW

For one man automobile pickup and delivery service MOTOR GLIDE, with self-shifting transmission and Cycletow equipment, is the most efficient and economical unit available.

Initial outlay for the self-shifting MOTOR GLIDE CYCLETOW is small and its maintenance cost is relatively even smaller. Safe, speedy pickup and delivery service can be rendered at a fuel cost of but a few cents a week.

Large automotive maintenance companies and individual service stations alike have proved MOTOR GLIDE CYCLETOW'S practicality and low operating cost — many have earned their entire investment in a remarkably short period.

MOTOR GLIDE CYCLETOW makes pickup and delivery service profitable for everyone.

Have the self-shifting MOTOR GLIDE CYCLETOW demonstrated for you.

Cycletow equipment includes a towbar, which is quickly attached to any bumper, and two auxiliary wheels, which carry the rear drive wheel while towing and fold up alongside the motor hood while the rider goes to and from a pickup or delivery.

For carrying tools, part or small accessories a parcel carrier may be added to the hood. A windshield carrying your advertisement also is a practical addition.
